

Canada Holds Key Position For Direct Air Routes To Markets Of Europe And Asia

CANADIANS can contemplate the post-war air with a confidence based upon a bountiful geography and a comprehensive ground apparatus on direct routes to the rich markets of Europe and Asia, says an article on "Canadian Post-war Air Policy" in the magazine "Fortune."

The article notes that at the present working range of transport aircraft, the article says, "the most important routes between North America and Europe and Asia traverse Canadian territory or British possessions (Newfoundland and Labrador) adjacent to it. And for the future there are, of course, the much discussed great circle routes over the north-pole regions to Europe and Asia. If and when these routes materialize, Winnipeg, as an approximate geographical centre of the U.S. and Canadian continents, will become one of the great ports of international air trade."

"Canada is sitting pretty in other respects," the article continues. "The war has opened a tremendous expansion in Canada's post-war air policy, has fostered in the matter of airports, repair shops, communications, and other ground facilities. In particular, two new systems aimed toward Europe and Asia have been developed: the northwest slanting route from the U.S. frontier to Alaska, which is being handled by the Alaska Highway, and the shorter, more direct route through the interior of the north, which opens a great-circle shortest distance channel between the west coast of the United States and Asia."

"The fact that the British commonwealth air training fleet is based on Canadian soil has whipped up interest in aviation," the article goes on. "The war has opened up 250,000 Canadians trained in aviation repair shops, including 100,000 mechanics (workers) from pilots down to maintenance. For a nation of less than 10 million people this is a big draw upon."

"After reviewing the strategic importance of the air as exclusively U.S. operations and the fact that Trans-Canada Airlines should monopolize international and other main line domestic routes, the article reports that Canada has desirable routes to the North Atlantic to Europe, through Alaska and the Arctic, and across the Pacific from Vancouver to the Orient. In the latter case, Canada would like to operate their own service to Bermuda and Hawaii."

"To satisfy Canadian aspirations," the article concludes, "the nation should start its airlines into Alaska, Hawaii, which have always been 'hot' spots. It would mean equipping Canada with long-range equipment—at least to tide her over the immediate period—until she can begin with the British most reasonable operation of the North Atlantic route. But the right to operate through Canada, which is the right to set up an air line of her own, is a prize which has not yet been won by any of the nations."

Animal By-Products Are Used In Manufacture Of Many Textile Articles

Manitoba is one of the few states that has no fur of a short, dense, soft, and fine texture. Prior to the year of 1914-15, furs from Manitoba were used for making fur coats, particularly from the latter country, but since that time North American furs have been manufactured and sold in their own right. This has been brought about by the fact that the fur of the muskrat is used in the processing of animal by-products produced in plants under Government inspection. The inspection of the muskrat is most by-product and of the muskrat is used in the manufacture of fur coats, particularly from the latter country, but since that time North American furs have been manufactured and sold in their own right. This has been brought about by the fact that the fur of the muskrat is used in the processing of animal by-products produced in plants under Government inspection.

"The by-products of furs are varied and important. The fur of the muskrat is used in the manufacture of fur coats, particularly from the latter country, but since that time North American furs have been manufactured and sold in their own right. This has been brought about by the fact that the fur of the muskrat is used in the processing of animal by-products produced in plants under Government inspection."

Keep Sealones Clear

Many Canadians Serve On Sealones

They have all the value of a battle cruiser, these little minisubmersibles that keep the seabed clear for commerce, but they don't have nearly as much fun.

The admiralty pays tribute to these small ships in an official booklet called *Little's Majesty's Minisubmersibles*.

Many Canadians serve in this end of the naval service, men such as Lieut. "Mac" Rutland, of the Admiralty, who was the D.B.C. for his minisubmarine work at Tiberius.

Another is Lieut. "Mac" Rutland, of the Admiralty, who was the D.B.C. for his minisubmarine work at Tiberius.

Another is Lieut. "Mac" Rutland, of the Admiralty, who was the D.B.C. for his minisubmarine work at Tiberius.

SELECTED RECIPES

RICE MOROCCO
1 cup milk
2 tablespoons Raisin Bran
1 cup corn
1 cup raisins
1 cup apricots
1 cup figs
1 cup dates
1 cup prunes
1 cup apples
1 cup pears
1 cup peaches
1 cup plums
1 cup cherries
1 cup grapes
1 cup oranges
1 cup lemons
1 cup limes
1 cup pineapples
1 cup mangoes
1 cup papayas
1 cup guavas
1 cup passion fruits
1 cup tamarinds
1 cup cashews
1 cup almonds
1 cup walnuts
1 cup pecans
1 cup hazelnuts
1 cup pistachios
1 cup macadamias
1 cup coconuts
1 cup pineapples
1 cup mangoes
1 cup papayas
1 cup guavas
1 cup passion fruits
1 cup tamarinds
1 cup cashews
1 cup almonds
1 cup walnuts
1 cup pecans
1 cup hazelnuts
1 cup pistachios
1 cup macadamias
1 cup coconuts

Wash and drain rice, cook in milk. Add corn syrup and salt. When ready to eat, add raisins, apricots, figs, dates, prunes, apples, pears, peaches, plums, cherries, grapes, oranges, lemons, limes, pineapples, mangoes, papayas, guavas, passion fruits, tamarinds, cashews, almonds, walnuts, pecans, hazelnuts, pistachios, macadamias, coconuts.

Mash chocolate in top of double boiler. Add corn syrup and raisins. Seal with wax. Add salt and butter and serve hot over rice. Or, if preferred, chill before serving.

The contrast of a hot sauce on well-chilled desserts is delightful. This sauce alone is delicious with hot baked pies, plain cottage pudding, steamed pudding, unfrosted cake, or served hot or cold with fruit.

The port of Marcellus is almost cut off from the rest of France by high hills.

Enjoying The English Springtime

Ala Fure in Britain, was a moment at hand when the English Springtime was almost cut off from the rest of France by high hills.

Sweeping The Streets

London Women Have Taken Over The Job And Like It

In wartime Britain women do everything from shelling to street sweeping. As you watch them sometimes at laborious, crude work, you wonder how they feel about it.

In Soho, peace-time jobs of quiet, refined restaurants and street shops, plump French, a sharp was discovered by her trade as a street sweeper. She was indeed to go to her work and left her job to a woman working at a bank.

In her narrative she told how she "liked" road sweeping before her husband was killed during an air raid.

It also developed within her a homely philosophy. She notices things about people and the life she had never realized before. "You see life on the job," she said thoughtfully.

She is happy and you see how they are sad and miserable. You see everything that's going on.

She is happy and you see how they are sad and miserable. You see everything that's going on.

She is happy and you see how they are sad and miserable. You see everything that's going on.

She is happy and you see how they are sad and miserable. You see everything that's going on.

She is happy and you see how they are sad and miserable. You see everything that's going on.

NATIONAL SELECTIVE SERVICE

Freedom's Fires Must Be Fed our COAL!

Canadians must dig and deliver coal that we may all convey, power vital war plants, keep our railroads rolling, preserve the nation's health!

The coal mining industry—miners and management alike—have done wonders to produce coal, but they need help. More workers must be provided, or we fail—possibly fall—in this grim hour. Nature has been generous but we must help ourselves. Our mines are rich, but underground. By Proclamation, His Excellency the Governor General in Council has declared that labour supply for coal mines ranks as a national emergency. Further, in order to provide manpower for coal, the Governor in Council has issued an Order in Council aimed at swelling the flow of coal from mine to firepit.

This Order is of vital interest to everyone in Canada. Every Canadian should read and study its provisions, to see whether it demands any action on his part:

1. EVERY EMPLOYER, REGARDLESS OF HIS INDUSTRY, must advise his employees of their Regulations, and he must assist in discovering whether any of his employees have had previous experience as coal mine workers.
2. EVERY EMPLOYER, REGARDLESS OF HIS INDUSTRY, who has had previous experience as a coal mine worker, must report that fact to his employer as soon as possible, on May 26th, 1943.
3. A "COAL MINE WORKER" FOR THREE PURPOSES: since January 1st, 1935, has worked under provisional certificate or license in an underground coal mine, or who, since the same date, has been employed for a total of at least 24 weeks in the industry of coal (except as a day worker).
4. EVERY EMPLOYER, NOT A COAL MINE OPERATOR, who has had previous experience as a coal mine worker, must report that fact to his employer as soon as possible, on May 26th, 1943.
5. SELECTIVE SERVICE OFFICERS ARE AUTHORIZED to require ex-coal mine workers to report for interview and to accept work at a coal mine.
6. SELECTIVE SERVICE OFFICERS MAY REQUIRE any man in employment, if subject to Mobilization Regulations, and who has been trained in coal mine work, to accept work at a coal mine.
7. NO COAL MINE OPERATOR may terminate the services of any coal mine worker without written permission from a Selective Service Officer.

Such is the substance of the new regulations. Full details may be had at any Employment and Selective Service Office. If these provisions require action on your part, you are urged in the national interest to comply with them. Severe penalties are provided for non-compliance, but the Government relies on the cooperation of the citizens of Canada to make prosecution unnecessary for prompt action as required. This is a grave emergency. Act at once.

IS THE GERMAN ARMY CRACKING?

Following the wholesale surrender of German troops in North Africa, the news of their capitulation in a British publication raises the question as to whether 1918 is about to be repeated in this year of 1943.

It is a legitimate speculation in view of various events that have been and are taking place in the war against the Nazis. The men of the German Army are sturdy opponents until hope dashed; that is, they were demoralized in 1918 in spite of the desperate resistance put up by picked bodies of machine gunners. In Tunisia, the troops of von Arnim and Rommel had their "backs to the wall," similarly to Haig's British Army in the month of March and April, 1918, but with the British there

was no wholesale surrender, and the comparison becomes closer when considering Dunkirk. It is true that, in a great measure, the German army was able to account for the final results of the two operations at Tunis and Dunkirk. There are reasons, however, the fact that 250,000 would-be supernumeraries of the human race surrendered tamely enough.

In his memoirs, written as a defence against the charge that he, personally, was responsible for the surrender of 1918, Prince Max of Baden tells of a war council meeting with Ludendorff and Hindenburg, in which the soldiers gave as their reason for demanding an armistice, that picked cyclist corps were going forward to stop the rot were greeted with jeers and shouts of "strike-breakers" by mobs of retreating German troops. To use a common expression, the average German soldier was up to the neck in the rot.

The point the writer of the article is endeavoring to make is that history is repeating itself. The fact that 250,000 would-be supernumeraries of the human race surrendered tamely enough, in his memoirs, written as a defence against the charge that he, personally, was responsible for the surrender of 1918, Prince Max of Baden tells of a war council meeting with Ludendorff and Hindenburg, in which the soldiers gave as their reason for demanding an armistice, that picked cyclist corps were going forward to stop the rot were greeted with jeers and shouts of "strike-breakers" by mobs of retreating German troops. To use a common expression, the average German soldier was up to the neck in the rot.

The point the writer of the article is endeavoring to make is that history is repeating itself. The fact that 250,000 would-be supernumeraries of the human race surrendered tamely enough, in his memoirs, written as a defence against the charge that he, personally, was responsible for the surrender of 1918, Prince Max of Baden tells of a war council meeting with Ludendorff and Hindenburg, in which the soldiers gave as their reason for demanding an armistice, that picked cyclist corps were going forward to stop the rot were greeted with jeers and shouts of "strike-breakers" by mobs of retreating German troops. To use a common expression, the average German soldier was up to the neck in the rot.

more important is the fact that, on this point, the peoples of the Allied Nations are obviously in agreement with their leaders. On the other hand, the Italians, where not absolutely indifferent, appear to be silently resentful of their comrades in arms, while it is, perhaps, not too much to say that the Germans, who are being revealed, that for the last time average German realizes that he has nothing to gain and a good chance of losing life itself by the prolongation of a conflict in which he suffers all the penalties while his Nazi masters enjoy all the privileges.

Local and District

Mrs. Geo. Bolster is a patient in Drumheller Hospital.

Mrs. John Dymtryk was a week end visitor in Calgary.

Geo. E. Kennedy, of Stettler, was a visitor in Delia on Wednesday last week.

Miss Isabel Hoy spent a few days vacation with her parents in Delia recently.

Miss Ellen Hudson spent the holiday week end at her home in Delia.

Pte. George Imier is spending his leave at the home of his parents, Mr. and Mrs. H. Imier.

Miss Edna Long, C.W.A.C., has returned to duty after spending her leave at home.

Mrs. Gordon Cook and baby daughter, Karen Lee, of Calgary, are visiting with Mr. and Mrs. Roy Cook in Delia.

Mrs. Leslie Knudsen, who has been ill in the Hanna Hospital recently, is now recovering satisfactorily at home.

Mr. and Mrs. Geo. Hunt and daughter, Myrna, are spending a vacation with Mr. and Mrs. Geo. Edgley.

Born on May 10, at the McGill Hospital, Montreal, to Cpl. Jack McCully, R.C.A.F., and Mrs. McCully, a son.

It is reported that E. Coates has now recovered from an infected hand, after spending some time in the Delia Nursing Home.

Mrs. and Mr. Albert Dawson motored to Calgary over the weekend, to spend the holiday with members of the family.

Mrs. Kinsick left by train on Saturday to spend the week end in Calgary, and proceeded later to Granum, to visit a nephew for a short vacation.

The Misses Alice and Evelyn Rieger, who finished studying at the Normal School, Edmonton, are spending a vacation at the home of their parents.

Miss Winnifred Newman, who is a nurse-in-training at the Holy Cross Hospital, is spending her vacation at the home of her parents, Major and Mrs. J. L. Newman.

Word has been received of the death of Mrs. Wm. Bickell, a well-known and highly respected pioneer of the Delia district. Her husband, who pre-deceased her in 1918, was the first secretary of the Delia Improvement District established in the newly-opened territory.

A break in the warm weather occurred on Saturday last, when two light showers of rain fell in the village. The cold weather was experienced on Sunday and there were indications of a dust storm in the north. Empire Day brought typical spring weather again and several families were out visiting friends.

It has been discovered that in many cases oats and barley threshed this spring will not be ready for export until late in the season. Therefore, the Delia A.I.A. has addressed a request to the Wheat Board that it should relax its policy in the embargo on the sale of these grains, in order that the farmers may be in a position to purchase good seed.

The Health League of Canada 111 Avenue Road, Toronto, Ont.

Every Garden. A large portion of the vitamins, minerals and bulk required in the daily diet can be supplied from a small garden. Every Canadian householder should aim to have a Victory Garden this year. Those who want early potatoes and vegetables should do their sowing at once, thereby securing thousands of health giving foods at low cost during the summer months.

The commercial supply of carrots, cabbage, tomatoes, onions, beans, green peas and sweet corn is not expected to be adequate in the immediate future. Along with such vegetables the following should be grown: Lettuce, Swiss chard, broccoli and spinach. These are valuable in the diet, supplying vitamins and minerals necessary to health and vigor. The vine crops—cucumbers, water

and squashes do not fit the small garden and should be grown only where space is abundant.

Plus your Victory Garden carefully so that there will be no waste of space, nor overcrowding. Vegetable and flower beds should be completed now, and the varieties

desired should be ordered from a reliable seed house or your local merchant. If you are not growing your own tomatoes, cabbage, carrot, lettuce, broccoli, spinach and celery plants, you should order your requirements. A recommended list for your district may be obtained from your Provincial Department of Agriculture or from the Federal Department of Agriculture.

The Health League of Canada urges the planting of Victory Gardens throughout the country because vegetables are essential to good nutrition. But when making out your own list do not neglect the flowers. Moral and mental fitness are maintained with the beauty of flowers (trees and shrubs). Morale is as vital to Canadian determination to win as a sufficiency of food.

American industry was well equipped to cope with her own huge war requirements largely because of the vast Italian orders which had built it up before Pearl Harbor.

There goes your Letter to your Boy...

IN IT, you put across the great stretches of this Dominion with the men and materials of war, so that all of us may live in freedom. Twenty-four hours a day our railway wheels are rolling, driven by a power of over 1,500,000 watts, serving two major fronts... the home front and the fighting front. "Keep 'em rolling" is their watchword, whether it's food or fuel, tanks or troops. Or just your letter to your boy...
